Cybersecurity Essentials

for Small & Midsized Businesses

Enterprise-grade security package purpose-built for growing SMBS.

The OLS Advantage

OLS goes beyond tools and alert. We deliver true cybersecurity partnership. Grounded in Pacific Northwest community values and a security-first mindset, we help small businesses reduce risk, strengthen compliance, and build operational resilience.

Our managed security services unite advanced threat protection, 24/7 monitoring, and strategic guidance into one predictable, proactive package.

Your business, focused on growth—not defense.

Streamline Your Security *and* Your IT Costs

We take a security-first approach to everything we do—implementing layered defenses, managing access, monitoring for threats, and guiding small businesses through compliance requirements like HIPAA, PCI, and CIS. Our goal is to reduce risk, ensure business continuity, and help SMBs meet evolving regulatory demands with confidence.

- ✓ **Risk Mitigation**
- ✓ **Threat Protection**
- ✓ **Audit Readiness**
- ✓ **Operational Resiliency**

Scalable protection. Resilient productivity. One predictable monthly cost. That's security, simplified. That's OLS.

These industries depend on SMB security solutions from OLS.

Construction

High turnover, remote sites & countless connected devices create constant risk.

Manufacturing

Connected machinery, supplier integrations & production uptime demand protection.

Professional Services

Client confidentiality & compliance are non-negotiable for building trust & scalable growth.

Regulated Industries

Compliance frameworks add layers of regulatory complexity & risk that can be hard to simplify.

Nonprofits

Limited budgets & donor data make nonprofits prime targets for cybercrime.

How can we put *your* business first?

Cybersecurity Essentials

OLS: TECHNOLOGY

Embedded security & risk reduction. One predictable monthly price.

The Cybersecurity Essentials (CES) offering from OLS pairs with our managed IT services to provide holistic tech and compliance support, delivered by friendly OLS experts and backed by predictable, per-user monthly pricing–not by the hour.

OLS Security Solutions and Services Include:

Security Assessments

Evaluate your current cybersecurity posture. Explore recommendations to close gaps, reduce risk, and align security with business goals.

Firewall Management

Always-on firewall device and policy protection that keeps your team safe from outside threats without interrupting their work and their processes.

Endpoint Security

Protection for mobile devices, laptops & workstations against malware & ransomware. Secure data access from anywhere your team works.

Patch Management

Regular deployment of security updates & software fixes across your environment. Keep systems current & protected from new threats and exploits.

Disaster Recovery Planning

Structured strategies to restore data & operations after cyber incidents or outages. Minimize downtime. Ensure business continuity & resiliency.

Vulnerability Management

Protect your applications and devices-and your team's productivity-from exploitable flaws and vulnerabilities through proactive patching.

Security Awareness & Training

Employee-focused education and simulations to reduce human error. Build a culture of security awareness for your first line of defense–your team.

Identity Access Management (IAM)

Securely and efficiently control access within your digital environment using authentication methods that ensure good password hygiene.

Multi Factor Authentication

Adds an essential layer of login security across devices and systems. Prevents unauthorized access and strengthens account protection.

Secure Media Erasure & Disposal

Effective data destruction and hardware disposal for retired equipment. Protects sensitive information. Environmentally responsible compliance.

Proactive Network Monitoring

Continuous surveillance of network traffic and activity for early threat detection. Identifies and addresses issues before they impact your business.

24/7 Security Operations Support

Around-the-clock monitoring & response. Keep your business protected at all hours with real-time detection and incident response.

IT that's more than tech–it's fuel for growth.
